ComPack™
Universal Telephone Audio Interface

Remotely Anywhere.
Pick up this new handheld road tool to get audio in and out of analog phone lines, PBX systems, even cell phones. Perfect for Remote Broadcasts, IFB feeds, or interviews over any phone connection.

Wireless Phones and Notebooks.
Simply plug ComPack into the 3.5mm headset jack of your wireless phone or notebook computer. Your cell phone will recognize ComPack as a headset which will disable the internal mic and speaker.

ISDN, PBX, and VoIP Systems.
Unplug the handset and plug the coily cord into ComPack. You can now send and receive audio through the ISDN, PBX or VoIP telephone set.

Analog Phones.
Plug ComPack into an RJ-11 jack, go off-hook and dial, or answer an incoming call.

Add a Phone Line to the Party Line.
ComPack also functions as a simple telecom interface for your beltpack intercom system. This no-frills feature allows you to connect the 3 pin male XLR to your wet party line. This provides a full duplex, always-on connection to any telephone network.
