The Thetis 300 subwoofer is the essential part of your home theater set-up.

Versatile, it will also be an ideal addition to your stereo system, for example to accompany smaller speakers. Equipped with a 20cm, downward-facing driver and an amplifier of 150W, this subwoofer in a compact format allows your set-up to considerably extend the bandwidth in the low frequencies.

Using a bass-reflex principle, it keeps a limited volume while offering surprising performance.

The Thetis subwoofers feature numerous inputs, allowing them to be associated with all types of amplifiers. They include a direct LFE input, standard RCA, and high-level inputs for amplifiers with no suitable output.

You can adjust the volume, the phase, and the frequency roll-off for a perfect fit with your main speakers.

Each Thetis subwoofer is supplied with a remote, an LED display on the front panel providing visibility of the sound setting. It also features an automatic standby/wake mode.
