

The active BR02 CONNECT speakers form a compact and versatile stereo system. Featuring one of the most complete amplifiers on the market, they are ideal for rooms ranging from 8 to 20m².

Directly connect your turntable with the built-in MM phono preamplifier. The Bluetooth 5.0 APTX HD module ensures high-definition streaming (24 bits / 48 kHz). Connect the new ARC TV input via an HDMI cable, the speaker can be synchronized with your TV's remote control for simplified operation (ARC/CEC technology).

If you're working from home, enjoying a gaming or studio monitor experience, connect your computer to the USB-B

port to achieve studio-quality sound without data loss (384KHZ/32BIT, DSD 256). Coaxial, optical and RCA inputs, along with a subwoofer output, provide connectivity for all your audio/video devices.

The 2x50 Watts Class D amplifier, combined with its 13cm TRIANGLE driver in natural cellulose paper and 25mm silk dome tweeter, delivers a perfectly controlled linear frequency response.

The speakers come with a power cable, a 3-meter connection cable between the two speakers and a long-range RF remote control (up to 15 meters).
